

EFFI

ELECTRONIC FACTOR FINANCIAL INTERFACE

WHY

EXPLANATION

Today the internet is providing us a lot of opportunities to enhance business to business information exchange. Our EFFI takes this a step further with automation to help productivity. Electronic factor financial interface will submit orders to your factor for approval/decline and return that information to you system without the need for human intervention and re processing. Once an order is invoiced , the system will transmit your factor assignment without the need for paper or data entry.

BENEFITS

AUTOMATION

No Data entry required to submit orders and invoices to factors.

Apparel Manufacturing Software (see brochure)

Automatically updates approved/declined orders.
